

To be held in conjunction with CommunicAsia on 14-17 June, EnterpriseIT2005 will showcase the world's latest Information Technology (IT) solutions.

A future for the

enterprise

▶▶ **EnterpriseIT2005**, an annual enterprise technology exhibition in Singapore, will showcase the latest Information Technology (IT) solutions that help companies lower their cost structures and improve the efficiency of business processes.

Running for four days on 14-17 June, EnterpriseIT 2005 will feature the latest in web services, storage systems, business intelligence, content management,

security management, outsourcing services, Radio Frequency Identification (RFID), open source, and other innovative solutions. The show caters to the technological needs of industries such as banking, logistics, healthcare, education, transportation, government among others.

EnterpriseIT2005 will be held in conjunction with CommunicAsia, a communications and IT event for

the Asia-Pacific region. Companies can take advantage of the diverse spectrum of exhibitors and visitors at the two shows to network, exchange ideas and cut business deals with over 1,500 companies and 45,000 business professionals from more than 50 countries. 80 percent of exhibitors at last year's show were from overseas, and came from countries/regions as diverse as Germany, Korea, Sweden, Canada, Ireland, the UK, US, India, France, the Philippines, and New Zealand amongst others.

Some technology companies participating in EnterprisIT and CommunicAsia2005 include Aces, Arianespace, Andrew Corporation, Binariang Satellite, CBOSS, Concerto Software, Huawei, Intelsat, LG Electronics, Lucent Technologies, Motorola, Panasonic, Polycorn, Samsung, Shin Satellite, Siemens, Sony Ericsson, Tandberg, Telekom Malaysia, UTStarcomm, Unified Communications and Worldsat, ZTE amongst others.

"As Concerto Software continues to grow in Asia Pacific, participating in CommunicAsia and EnterprisIT is an ideal forum for us to communicate our message and showcase our offerings to the market," said Pramod Ratwani, Vice President (VP), Asia Pacific & Middle East, Concerto Software. "This year, we are pleased to be showing attendees how they can make the move from traditional voice to VoIP at their own pace and how Concerto Software can help them transform the way they interact with their customers."

EnterprisIT-related conferences at CommunicAsia Summit

EnterprisIT visitors can attend Enterprise IT-related

conferences on mobile enterprise and security at the CommunicAsia2005 Summit.

The Mobile Enterprise conference track held on 16 June is themed 'Embracing Mobility to Increase Productivity'. The conference track will cover pertinent issues relating to convenience vs security in remote access, delve into whether Third Generation (3G) will be a cornerstone of enterprise mobility, and explore the dynamics behind the growing popularity of Wireless Fidelity (Wi-Fi), Internet Protocol (IP) Telephony and Unified Messaging.

Focusing on security challenges and countermeasures for companies' networks, the Security conference track on 15 June will drill into topics such as identity management, content security, disaster recovery, business continuity planning, and end with a panel discussion on managed security services. ■
