

At the forefront of Asia's Communications and IT Industry!

Participate in Asia's most established and comprehensive info-comms technology show, and you can tap into the abundant business opportunities of the Asian info-comms market and beyond!

The past 12 months seem to have flown by, and once again CommunicAsia is upon us. Considered by many to be the region's most important event, companies will be present to showcase their products and services to an audience made-up of visitors from across the Asia-Pacific. In previous years more 40,000 visitors have made the journey to find out what is new in the communications industry.

As the most international exhibition in Asia, CommunicAsia is the doorway for global players set to participate in the Asian info-communications market.

Market developments

The event takes place amid a twelve month period that has been remarkable for a number of reasons - mergers, acquisitions, and IPOs. The news that Intelsat was going to purchase PanAmSat was, maybe, the most stunning.

However, developments in the region are proving just as important. CommunicAsia is taking place just at that moment when we might finally be witnessing the creation of a truly regional (meaning 'supra-national') satellite market.

The most interesting example in this sense is the recent buyout of Thailand's Shin Corp by Temasek Holdings of Singapore. At the time of going to press, in fact, the political situation in Thailand is still hot and the buyout has yet to be approved by the country's regulation authorities.

However, should the deal receive the go-ahead, Asia could well end up with the first truly regional satellite operator encompassing resources that span from Singapore and Australia to Thailand.

Maximise exposure

Meet more than 47,000 industry professionals, decision makers, buyers, customers and competitors from over 100 countries to network, build alliances and make business deals. Be at CommunicAsia2006 and you can tap into the vast business opportunities in the Asian market and beyond! Scheduled to be held from 20 – 23 June 2006, expect to meet ICT professionals including the region's top operators, regulators, vendors and consultants all under one roof.

The event's record number of more than 1,400 exhibiting companies from over 50 countries and a total of over 22,000 overseas attendees attest to the fact that CommunicAsia is not an exhibition catering to just the domestic market. It brings access to multiple markets across the region and beyond.

Three sub-shows

Incorporating the three sub-shows of

MobileCommAsia2006, NetworkAsia2006 and SatComm2006, CommunicAsia2006 is the most comprehensive info-communications event showcasing the best and the latest in 3G, mobile communications and applications, broadband wireless, next generation networks, enterprise networks and technologies, VoIP, satellite communications and technologies, IP technology, infrastructure solutions and many more!

Running alongside Asia's most established showcase of the latest communications technologies and innovative products, is the international forum "CommunicAsia2006 Summit", to be held 20 – 22 June 2006.

The conferences at CommunicAsia2006 Summit will focus on Mobile Technology and Business Applications, Next Generation Networks and Broadband Communications. Here, the delegates will discover the latest and most lucrative business applications. In addition, "CEO Perspectives", the successful plenary where the industry's top minds gather to deliberate on key strategic issues, returns again to kick start each day. ■

Why you should attend CommunicAsia

SEE CONVERGENCE UNDER ONE ROOF
